

EDUCATION

CLEAN AT WORK, AT HOME, AND ON THE GO.

We make better wipes,
because the future of technology
has your fingerprints all over it.

You're a teacher. So you know: Screens are in – blackboards are out – and so are those erasers you once banged together to remove the chalk dust. Cleaning the «blackboards of the future » presents a new challenge for teachers. Your classroom's a garden of sensitive hi-tech surfaces – whiteboards, smartboards, tablets, computers, and TV's, projector lenses – you name it. How do you keep them clean, when little hands are busy all day gucking up these sensitive surfaces? Harsh disinfectant wipes contain germicides, but may harm those delicate optical surfaces – and worse, trigger asthma or allergy attacks. Not with iCloth. They gently, effectively clean any sensitive optical surface, separating and removing germy dirt, so that surfaces stay sparkling clean, without harming your smartboard or your tablet (and young lungs). Think iCloth wipes are your little secret? Think again! You're in great company - all Ivy league schools are customers.
