

LAW ENFORCEMENT

CLEAN AT WORK, AT HOME, AND ON THE GO.

Today's law enforcement vehicles are high tech marvels. On board laptop, mobile radar, dash-cams front and back along with touchscreens to control them. And the tech revolution is just beginning. Biometrics are increasingly the standard for identification. And automatic license plate readers are now a reality. But this amazing tech is optical - and those surfaces must be clean to be effective. Keep an iCloth in your squad car to ensure all your law enforcement tools are functioning at peak performance. We earned our stripes in the aviation industry, and are used by law enforcement throughout North America and most branches of the military where precision is key touchscreen responsiveness and clarity are vital.
